

Ubendol Tab.

(Alibendol 100mg)

■ COMPOSITION

Each tablet contains

Alibendol100mg

■ DESCRIPTION

Pink, circle, film-coated tablet

■ INDICATIONS

Dyspepsia, nausea, vomiting, constipation

■ DOSAGE & ADMINISTRATION

300mg~400mg a day, in three to four divided doses, before meals and at bedtime. Dosage may be increased and reduced according to age and symptoms.

■ CAUTIONS

1. General precautions

- 1) Consult with doctor or pharmacist before administration to the patients who are administering the other drug.
- 2) When administer for 2 weeks and there is no improvement, stop administration and consult with doctor or pharmacist.

2. Children

UBENDOL should not be administered under 7 years old of age.

3. Precautions during storage and handling

- 1) Keep out of reach of children.
- 2) Store at the place where are avoiding sunlight and if possible, with low humidity and cool and closed tightly.
- 3) Don't put into other container to prevent misuse and preserve of quality.

4. Other

- 1) Digestive Process : Alibendol stimulates not only the digestion and absorption of fat but also the absorption of fat-soluble vitamins (vit A,D,E,K), calcium and iron by activating the action of Lipase, Glyceridase.
- 2) Stimulation of cholanopoiesis and biliation : Alibendol show biliation over 3hours continuously. Contrary to hydrocholeretics-secreting low-viscosity bile, Alibendol not only stimulates the secretion of high-concentrated bile but also has longer duration of action than dehydrochloric acid. Also, Alibendol stimulates biliary excretion by relieving abnormal concentration of Oddi's sphincter.
- 3) Safety : Alibendol can be prescribed safely since the safety is validated with children (4mg/kg/day) and has no adverse events, contraindications and drug interactions so it can be prescribed.

■ STORAGE

Store in tight container at room temperature (1~30℃).

• Keep out of reach of children
